

A screenshot of the Prometheus web interface. At the top, there's a navigation bar with icons for Prometheus, Query, Alerts, Status, and other settings. Below the navigation is a search bar containing the query >_ http_requests_total. To the right of the search bar are three dots and an 'Execute' button. Under the search bar, there are tabs for Table, Graph, and Explain, with 'Table' being the active tab. Below the tabs is a section for 'Evaluation time' with arrows to navigate between results. On the right side of this section, it says 'Load time: 89ms' and 'Result series: 1'. A single result series is listed: http_requests_total{instance="app-service:3000", job="app"}. At the bottom left is a blue 'Add query' button.

Prometheus

Aplicação Node.js com Prometheus e Nginx funcionando!

Programa rodando.
